

WHAT MAKES IAP PLANTERS DIFFERENT?

	GREEN MANUFACTURING	STEEL REINFORCED	COMMERCIAL GRADE	GRAFFITI & UV RESISTANT
IAP	*	*	*	*
COMPETITORS				

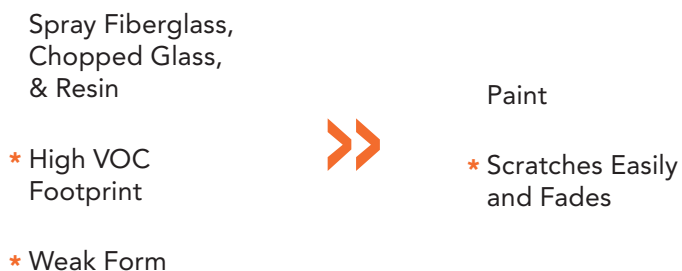

IAP's signature process of fusing natural metal to strong lightweight fiberglass forms creates uniquely beautiful as well as durable containers. Each object is manufactured to meet our exact standards, then custom finished in your choice of Bronze, Copper, Zinc, Cast Iron or Stainless Steel. The metals will age gracefully over time by developing a soft patina.

Our commercial grade steel reinforced fiberglass forms are two to three times stronger than competing brands. Once we combine our UV and scratch resistant Fusion finishes, you have one of the most durable exterior fiberglass containers available on the market.
