

IAP RECYCLING AND TRASH CONTAINERS

The pages that follow include items that can be used as planters, recycling, or trash containers. By simply changing the style of the top and sometimes the quantity of liners, we can modify the item to suit your needs.

IAP can provide 3M decals with the appropriate signage to identify the use of each multi-purpose container (i.e. trash, recycling, etc.). If you have a custom requirement, please contact us directly so we can make the decal to your specifications.

At IAP, we specialize in custom work. If you have a specific design or need, please contact us directly. We can manufacture a container that can include complex details such as logos.

Why Specify an IAP Recycling and Trash Container?

Custom Design 36x29x34

- +Quality hand laid fiberglass and steel reinforced. Two to three times stronger than competitive manufactures.
- +Long lasting Fusion finish. Our metal finish is UV, scratch and graffiti resistant. IAP containers will last longer and look better.
- +Fiberglass is non-flammable. To meet certification requirements a flame resistant resin is available.
- +Keep your design theme cohesive and match your IAP planters with corresponding IAP recycling and trash containers.
- +Full custom capabilities.
