Description

The Oasis is a modern modular set of trash and recylce containers. Shown above in our Fusion finish Brass, they are suitable for indoor and outdoor use, the durable finish has a long life cycle and can stand up to the commercial environment. The top openings differentiate between trash and recycle to aid ease of use, each container has a durable and waterproof liner with a rolled lip and handles. The narrow profile makes this ideal as a space saver while still having a standard capacity, when total gallon capacity is combined between the two it can handle medium to heavy use. Typically sold as a pair (trash/recycle) but can be purchased seperately, pricing is per piece. All of our designs can be special ordered in custom dimensions (mold fee and minimum quantity may apply).
